

Problem statement:

It is a common sight at busy traffic junctions where ambulances struggle to find a way to carry patients for treatment during the golden hour. Employing Drones which can carry payloads of 100kg, min at designated high traffic circuits will help many patients

Work Done:

- 1) Analysed the various resource about the project
- 2) Find out the tool required for the project
- 3) Analysed the use of tool used
- 4) Created the user stories for the project
- 5) Find out the challenges in this project
- 6) Created the block diagram for this project
- 7) Learning about the tools (Python, Html, Flask, CSS, SQL)
- 8) Created the table rough schema for this project
